### Function

**ATyS M** is a range of single-phase or three-phase modular motorised changeover switches with positive break indication. They enable on load changeover switching of two supply sources in remote control, automatic or manual mode. They are intended for use in low voltage power systems where interruption of the load supply is acceptable during transfer.

### Description

This quick-acting source transfer switch incorporates:

1. 2 mechanically interlocked switches including an electronic control-command module.
2. A quick-acting electric control unit enabling automatic or manual system operation.
3. Electrical specifications compliant with product standards, and a version identification.
4. Changeover switch wiring identification.
5. Control connections.
6. An RJ45 connection for a remote interface D10 / D20.
7. A connector for RS485 communication (Modbus), for the version with communication.

## Optional accessories

Auxiliary contacts	Each product can take up to 2 auxiliary contact blocks. Each accessory integrates 1 NOC auxiliary contact (for each position I, O and II) 1309 0001 or NONC for 1309 0011. Characteristics: 250 VAC / 5 A maximum. The ATYS d M includes 1x aux contact reference 1309 0001 as standard.		Ref. : 1309 0001 Ref. : 1309 0011
Bridging bars	To provide a common point on the outgoing side of the switch (load side).		Single phase product: Rating ≤ 125 A: 1309 2006 Rating 160 A: 1309 2016
			Three phase product: Rating ≤ 125 A: 1309 4006 Rating 160 A: 1309 4016
Voltage sensing and power supply tap	It allows connection of 2 x 1.5 mm <sup>2</sup> voltage sensing or power cables. The single-pole voltage sensing tap can be mounted in the terminals without reducing their connecting capacity. Do not use with the bridging bar.		Ref. : 1399 4006 2 parts/ref.
Terminal shrouds	Protection against direct contact with terminals or connecting parts. Other features: Perforations allowing remote thermographic inspection without removal. Possibility of sealing. Not for use on terminals with bridging bars fitted.		Ref. : 2294 4016 2 parts/ref.
Double power supply - DPS	Allows an ATYS d M to be supplied by two 230 Vac 50/60 Hz networks.		Ref. : 1599 4001

(1) Value for coordination with any circuit breaker that ensures tripping in less than 0.3s.

For coordination with specific circuit-breaker references, higher short-circuit current values are available. Please consult us.

\* - Subjected to MCCB's short circuit current limiting curves reading precision and data.

T - coordination possible up to the Max Icu value of the circuit breaker.

Values are based on characteristics published by breaker manufacturers at the time of the publication. Socomec cannot be held responsible for any modifications of those characteristics or for non-performance of circuit breakers
